PROFESSIONAL SUMMARY

Netcentric Computing graduate with a software development foundation and hands-on experience from an industrial placement on an enterprise IT team. Builds full-stack TypeScript web apps (Next.js, React) with authentication, relational data modeling, tested business logic, and CI/CD, alongside 10+ automation workflows and administration of 30+ user accounts across Active Directory and Microsoft 365. Comfortable across the stack from coding and database design to low-code automation and cloud administration. Seeking a software development, IT, automation or any related role to grow technical depth while contributing from day one.

TECHNICAL SKILLS

- **Software Development:** TypeScript, Java, PHP, JavaScript, Python, C++, Node.js, Next.js, React, React Native, Flutter, HTML/CSS; full-stack & mobile
- **Database & Backend:** MySQL, SQLite, Turso (libSQL), Drizzle ORM, relational design, queries, REST APIs, server actions
- **DevOps & Tooling:** Docker, Git, GitHub Actions (CI/CD), Vercel, unit testing (Vitest), Better Auth
- **Automation & Low-Code:** Power Automate, n8n, Microsoft Graph API
- **Cloud & Identity:** Microsoft 365 Admin, Active Directory, Azure AD, JumpCloud, Exchange Admin Center
- **Networking & Security:** Wi-Fi/UniFi setup, DNS/SSL troubleshooting, Microsoft Defender, DMARC, Wazuh, Packet Tracer
- **Analytics:** Power BI, Excel, SharePoint

EDUCATION

Bachelor of Computer Science (Hons.) Netcentric Computing Apr 2024 – Sep 2026
Universiti Teknologi MARA (UiTM), Shah Alam

Diploma in Computer Science Oct 2021 – Mar 2024
Universiti Teknologi MARA (UiTM), Samarahan 2, Sarawak

WORK EXPERIENCE

Technology Development — Intern Feb 2026 – Jul 2026
Forest Interactive Sdn. Bhd., Kuala Lumpur

- Built 10+ automation workflows across Power Automate and n8n — covering employee onboarding, welcome-email provisioning, salary-deduction and purchase-order forms, Asana reminders, and Teams broadcasts — cutting manual HR/IT setup steps.
- Provisioned and managed 30+ user accounts across Active Directory and Microsoft 365, handling onboarding, licensing, distribution lists, and security groups via Exchange Admin Center and Microsoft Graph API.
- Deployed and managed nPro (Wazuh-based) endpoint security across the organization's Windows and Mac devices, resolving enrollment issues and pushing remote commands to agents via JumpCloud.
- Handled email security in Microsoft Defender: quarantine reviews, phishing investigation and domain blocking, DMARC hardening, and Tenant Allow/Block List management.
- Developed an Employee Handbook & Policy module on a PHP/MySQL helpdesk portal with country-based routing (Malaysia/Indonesia/UAE), per-country acknowledgement tracking, and session-authenticated downloads.
- Led a 3CX-to-FreePBX (Asterisk) VoIP migration, diagnosing and resolving one-way audio, IVR routing, and outbound-call failures across SIP and FXO trunks.
- Resolved 30+ day-to-day support tickets: device setup and reformatting, printer configuration, VPN access, and network/DNS/SSL and Group Policy troubleshooting across multiple domains.

IT Technician (Internship) Sep 2023 – Mar 2024
Jabatan Perkhidmatan Komputer Negeri Sabah (JPKN), Tawau

- Designed and deployed secure, high-speed Wi-Fi network infrastructure for new departmental office spaces.
- Generated organizational reports using Microsoft Excel and Power BI to support data-driven decisions.
- Supported live-streaming and multi-camera production for government events and functions.

PROJECTS

- **Expense Splitter — Full-Stack Bill-Splitting Web App** (TypeScript, Next.js 15, Drizzle ORM, Turso, Better Auth, Vercel, Vitest) — Full-stack app for splitting shared group expenses and settling up in the fewest payments. Implements a greedy debt-simplification algorithm (net balances → creditor/debtor matching → minimal transactions, guaranteed $\leq N-1$ payments) backed by a unit-tested split-calculation layer supporting even, exact, and percentage splits with penny-accurate rounding. Features email/password auth, group and member management, full CRUD on expenses, recorded settlements with history, and per-person balances; deployed live on Vercel with type-safe SQL and 17 passing Vitest tests.
github.com/zaymm03/expense-splitter
- **Uptime Monitor — Self-Hosted Homelab Monitoring Tool** (TypeScript, Node.js, SQLite, Docker) — Full-stack monitoring service that checks HTTP endpoints on a schedule, persists check history to SQLite, and sends Telegram alerts on downtime with flap protection (alerts only after consecutive failures). Includes a live web dashboard with uptime %, response-time charts, and incident history, plus unit-tested core logic run via GitHub Actions CI and containerized with Docker.
github.com/zaymm03/zaym-uptime-monitor
- **zaymlab — Windows Server Active Directory Homelab** (Windows Server 2022, Active Directory, DNS, Group Policy, PowerShell) — Built a domain controller from scratch on Server Core (no GUI), driven entirely via PowerShell: configured static IP and AD-integrated DNS, promoted the first DC in a new forest (zaymlab.local), and set up an OU structure, security groups, test users, and a login-banner GPO. Documented as a portfolio repo with architecture notes, a build log, and reusable setup scripts. github.com/zaymm03/zaymlab-homelab
- **FSKM Indoor Navigation — Cross-Platform Mobile Navigation App (Final Year Project)** (Flutter, Dart, Firebase, Cloud Firestore) — Multi-floor indoor navigation app for the FSKM building that models walkable paths, rooms, stairs, and lifts as a graph and computes shortest routes with the A* algorithm. Implemented cross-floor routing via dynamic graph merging, rendered room labels and live navigation paths over scalable SVG floor maps with a custom Flutter path painter, and backed the system with Firebase Authentication and Cloud Firestore collections (rooms, nodes, edges, staff).
github.com/zaymm03/fskm-navigation
- **E-commerce Website** — Full-stack platform built with HTML, Java, and MySQL.
- **Power BI Data Visualization (Internship)** — Interactive dashboards analyzing organizational database data.

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco (2025)
- Introduction to Modern AI — Cisco (2025)
- Introduction to Data Science — Cisco (2025)
- Introduction to IoT — Cisco (2024)
- Introduction to Packet Tracer — Cisco (2024)
- Security Fundamentals — Coursera (2026)
- Identity Management — Packt (aligned with CompTIA Security+ SY0-701)

LEADERSHIP & ACTIVITIES

- Head of Multimedia, SULAM UiTM Computer Science Programme (2025).
- Head of Transport, SULAM Programme, UiTM Samarahan (2022).
- Volunteered in community service programmes, including a service-learning trip to Rumah Kanak-Kanak, Kuching (2023).

AWARDS & ACHIEVEMENTS

- Dean's List Award (Diploma) — three semesters (2021–2023).
- 3rd Place, Mobile Legends (MLBB), Sukan Antara Fakulti (SAF), UiTM Sarawak.
- 3rd Place, Rugby, MSSDT Zon Tawau.
- Biasiswa Kerajaan Negeri Sabah (BKNS) scholarship recipient (2024/2025).
- Participant, International Conference on Computer and Drone Application (ICONDA), 2022.
